*The MSCI EAFE Index is a widely recognized benchmark of the world's stock markets that typically includes 80% of index securities and select derivative instruments in Europe, Australasia and the Far East.

**A Morningstar category for funds that seek capital appreciation by investing at least 80% of assets in a variety of large international stocks with market capitalizations greater than \$5 billion. Morningstar assigns this category to funds where neither growth nor value characteristics predominate.

***This statistic reflects the degree to which returns fluctuate around their average over a period of time. When a fund has a high standard deviation, the predicted range of performance is wide, implying greater volatility.

[†]The Morningstar Tax Cost Ratio measures how much a fund's annualized return is reduced by the taxes investors pay on distributions. Mutual funds regularly distribute dividends and capital gains to their shareholders. Investors then must pay taxes on those distributions during the year they were received. The % Rank in Category is the fund's tax-adjusted total-return percentile rank for the specified time period relative to all funds that have the same Morningstar category. The most favorable rank is 1 and the least favorable is 100. Figures shown reflect the three-year period ended 3/31/09.

Fund Description

New Century International is dedicated to a philosophy ... diversification can reduce risk without sacrificing performance. The Portfolio's objective is to provide capital growth and, as a secondary objective, to earn income. New Century maintains rigorous investment qualifications for the mutual funds in which it invests: strong performance, reasonable risk-adjusted returns and consistent management styles. International investments may involve additional risks, such as currency rate fluctuation, different financial and accounting standards, and political instability that may cause greater volatility and expose the Portfolio to other risks generally not associated with domestic investments. Diversification does not assure or guarantee better performance and cannot eliminate the risk of investment loss.

Fund Highlights

- **Diversification** through a blend of large-cap, mid-cap and small-cap positions allocated geographically among mature and emerging markets
- **Access to ETFs** enables the Fund to invest in a specific country
- **Investments are not limited to a single fund family or institution**
- **Active management** consistently monitors fund objectives and performance
- **Simplified year-end tax reporting** on a single tax statement
