Investment Approach

The Portfolio primarily invests in mutual funds and ETFs that convey the Managers' thematic views. The Portfolio employs a combination of Top-Down and Bottom-Up investments across different market caps and geographies to optimize our return profile in varying market conditions. Special attention is paid to an investment's performance, active share, management, and capture ratios which we believe are the most important factors in evaluating future performance. We believe our thematic, multi-manager approach provides the opportunity for enhanced risk-adjusted return versus the U.S. Large Growth Category.

2017 Themes

- Strong U.S. Dollar
- Opportunities in Small and Mid cap U.S. Stocks
- Value potential in International Markets

The performance data quoted represents past performance. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original investment. Past performance does not guarantee future results, and current performance may be lower or higher than the performance data quoted. *A Morningstar category for Large-growth portfolios that invest primarily in big U.S. companies that are projected to grow faster than other large-cap stocks. Stocks in the top 70% of the capitalization of the U.S. equity market as defined as large cap. Growth is defined as fast growth (high growth rates for earnings, sales, book value and cash flow) and high valuations (high price ratios and low dividend yields). The Morningstar category returns are Survivorship Biased Free (SBF) Returns. SBF returns include all investments even if liquidated, merged or otherwise now obsolete. For category averages this would also include funds that were, but are no longer in a Morningstar category.

**A widely followed benchmark of large firms' stock performance which includes 400 industrial firms, 40 financial stocks, 40 utilities and 20 transportation stocks. The graph compares the growth of \$10,000 in the New Century Capital Portfolio with that of the U.S. Large Growth Category and the S&P 500 Index. The total returns are not adjusted to reflect the effects of taxation, but are adjusted to reflect actual ongoing fund expenses, and assume reinvestment of dividends and capital gains.

+ Figures shown reflect the three-year period ended 3/31/17. The Rank in Category is the Portfolio's total-return percentile rank for the specified time period relative to all funds that have the same Morningstar category. The most favorable rank is 1 and the least favorable is 100.

+Morningstar Ratings reflect risk-adjusted performance and are derived from a weighted average of the fund's 3-, 5- and 10-year (if applicable) Ratings. The Morningstar Ratings formula measures the amount of variation in a fund's performance and gives more emphasis to downward variations. Ratings are subject to change every month. The top 10% of the funds in the category receive 5 stars; the next 22.5% 4 stars; the next 35% 3 stars; the next 22.5% 2 stars; and the last 10% 1 star.
