**Investment Approach**

The Portfolio primarily invests in mutual funds and ETFs that convey the Managers' thematic views. The Portfolio employs a combination of Top-Down and Bottom-Up investments across different market caps and geographies to optimize our return profile in varying market conditions. Special attention is paid to an investment's performance, active share, management, and capture ratios which we believe are the most important factors in evaluating future performance. We believe our thematic, multi-manager approach provides the opportunity for enhanced risk-adjusted return versus the U.S. Large Growth Category.

**2017 Themes**

\*A Morningstar category for Large-growth portfolios that invest primarily in big U.S. companies that are projected to grow faster than other large-cap stocks. Stocks in the top 70% of the capitalization of the U.S. equity market as defined as large cap. Growth is defined as fast growth (high growth rates for earnings, sales, book value and cash flow) and high valuations (high price ratios and low dividend yields). The Morningstar category returns are Survivorship Biased Free (SBF) Returns. SBF returns include all investments even if liquidated, merged or otherwise now obsolete. For category averages this would also include funds that were, but are no longer in a Morningstar category.

\*\*A widely followed benchmark of large firms' stock performance which includes 400 industrial firms, 40 financial stocks, 40 utilities and 20 transportation stocks. The graph compares the growth of \$10,000 in the New Century Capital Portfolio with that of the U.S. Large Growth Category and the S&P 500 Index. The total returns are not adjusted to reflect the effects of taxation, but are adjusted to reflect actual ongoing fund expenses, and assume reinvestment of dividends and capital gains.

+ Figures shown reflect the three-year period ended 3/31/17. The Rank in Category is the Portfolio's total-return percentile rank for the specified time period relative to all funds that have the same Morningstar category. The most favorable rank is 1 and the least favorable is 100.

## Investment Approach

The Portfolio primarily invests in mutual funds and ETFs with a target 60/40 equities to fixed income allocation. We believe Balanced funds truly benefit from our multi-manager approach giving our investors a single vehicle containing best of breed core and tactical managers for both fixed income and equities, with both domestic and international allocations all in a single fund. We manage the Portfolio with a goal of a “smooth ride” seeking an appropriate return while maintaining a moderate risk profile.

The Portfolio primarily invests in mutual funds and ETFs with at least 75% of their exposure outside the U.S. The Portfolio Managers choose investments based on our own Top-Down, macro thematic analysis combining continent, country, FX, and sector dynamics. The resulting portfolio is concentrated and in order to reduce our U.S. investor's volatility, the Portfolio tactically hedges portions of its currency exposure back to the dollar, and does invest in emerging markets that the Managers believe have proper risk adjusted return potential.

#### Investment Approach

Using mutual funds, ETFs, ETNs, CEFs and structured notes, the Portfolio invests in ten investment categories to replicate the risk and return characteristics of the hedge fund universe while eliminating many of the issues that characterize hedge funds, such as: limited transparency, large investment minimums, burdensome tax reporting, liquidity constraints and extra layers fees. Alternative strategies were originally only available to large institutional investors such as pensions, endowments or accredited investors who used alternatives to enhance the traditional long-only portfolio, which held a combination of cash, stocks and bonds. Modern Portfolio Theory has demonstrated that a broad asset allocation including alternatives has the potential to optimize portfolio returns while mitigating volatility. The Portfolio provides active management and a diversified exposure to the alternative strategies universe in a mutual fund wrapper. Investments are selected primarily based upon a combination of strong risk adjusted returns and low correlations to the domestic equity market.

\*A Morningstar category for funds that offer investors exposure to several different alternative investment tactics. Funds in this category have a majority of their assets exposed to alternative strategies. An investor's exposure to different tactics may change slightly over time in response to market movements. Funds in this category include both funds with static allocations to alternative strategies and funds tactically allocating among alternative strategies and asset classes. The gross short exposure is greater than 20%. The Morningstar category returns are Survivorship Biased Free (SBF) Returns. SBF returns include all investments even if liquidated, merged or otherwise now obsolete. For category averages this would also include funds that were, but are no longer in a Morningstar category.

\*\*A widely followed benchmark of large firms' stock performance which includes 400 industrial firms, 40 financial stocks, 40 utilities and 20 transportation stocks.

\*\*\*The Barclays Capital U.S. Intermediate Government/Credit Bond Index is an unmanaged index of intermediate and long-term government securities and investment grade corporate debt securities.

+ Figures shown reflect the three-year period ended 3/31/17. The Rank in Category is the Portfolio's total-return percentile rank for the specified time period relative to all funds that have the same Morningstar category. The most favorable rank is 1 and the least favorable is 100.

Diversification does not assure or guarantee better performance and cannot eliminate the risk of investment loss. Investments in arbitrage strategies, distressed securities, options, foreign securities, and long/short selling will expose the Portfolio to additional risks and volatility. Short selling involves the risk of potentially unlimited increase in the market value of the security sold short, which could result in potentially unlimited loss for the funds employing this strategy. Investments in foreign securities may involve additional risks, such as currency rate fluctuation, different financial and accounting standards, and political instability that may cause greater volatility and expose the Portfolio to other risks generally not associated with domestic investments.

\*A 2.00% redemption fee is imposed on any shares redeemed within 30 days of their initial purchase. The redemption fee does not apply to shares purchased with the reinvestment of dividends, capital gains or exchanges.

\*\*The 12b-1 Distribution Fee for the 1-year period ended 10/31/16 was 0.21%. Under the Trust's Rule 12b-1 Plan, the Portfolio may pay up to 0.25% of its average net assets to the Distributor.

\*\*\*The Acquired Fund Expense Ratio reflects the fees and expenses incurred by the New Century Alternative Strategies Portfolio for the fiscal year ended 10/31/16 as a result of its investment in other registered investment companies. These expenses are not incurred directly by shareholders.

\*\*\*\*The Total Expense Ratio includes New Century Alternative Strategies Portfolio's Direct Expense Ratio of 1.25% and the Acquired Fund Expense Ratio of 1.15% for the period ended 10/31/16.

†Morningstar Ratings reflect risk-adjusted performance and are derived from a weighted average of the fund's 3-, 5- and 10-year (if applicable) Ratings. The Morningstar Ratings formula measures the amount of variation in a fund's performance and gives more emphasis to downward variations. Ratings are subject to change every month. The top 10% of the funds in the category receive 5 stars; the next 22.5% 4 stars; the next 35% 3 stars; the next 22.5% 2 stars; and the last 10% 1 star.

This report is not an offer for sale of shares in this Portfolio. Shares are sold only through the current prospectus, which must precede or accompany this report. Investors should take into consideration the investment objectives, risks, charges and expenses of the New Century Portfolios carefully before investing. The prospectus contains these details and other information and should be read carefully before investing. Total return figures are quoted net of fees and include reinvestment of all dividends and capital gains. Portfolio composition and performance returns are historical.
